VOLUME CONTENTS

January, Number 1

O. G. MARTYNENKO	1	Heat and mass transfer bibliography—Soviet works
P. J. ERENS and A. A. DREYER	17	Modelling of indirect evaporative air coolers
T. FUJII, K. SHINZATO and J. B. LEE	27	Various formulas and their accuracy concerning convective heat and mass transfer in the vapor boundary layer in the case of laminar film condensation of binary vapor mixtures
B. B. ROGERS and L. S. YAO	35	Natural convection in a heated annulus
A. BEJAN	49	How to distribute a finite amount of insulation on a wall with nonuniform temperature
M. PRUD'HOMME, T. HUNG NGUYEN and P. G. MAO	57	Numerical simulation of melting inside a rotating cylindrical enclosure
A. N. OSIPTSOV and YE. G. SHAPIRO	71	Heat transfer in the boundary layer of a 'gas-evaporating drops' two-phase mixture
Q. Q. LU, J. R. FONTAINE and G. AUBERTIN	79	Numerical study of the solid particle motion in grid-generated turbulent flows
D. E. FARROW and J. C. PATTERSON	89	On the stability of the near shore waters of a lake when subject to solar heating
Q. S. LIU, G. CHEN and B. ROUX	101	Thermogravitational and thermocapillary convection in a cavity containing two superposed immiscible liquid layers
C. V. S. MURTY	119	Evaluation of radiation reception factors in a rotary kiln using a modified Monte-Carlo scheme
S. D. KOLEV and W. E. VAN DER LINDEN	135	Application of Laplace transforms for the solution of transient mass- and heat-transfer problems in flow systems
R. P. TAYLOR, J. K. TAYLOR, M. H. HOSNI and H. W. COLEMAN	141	The turbulent thermal boundary layer with an abrupt change from a rough to a smooth wall
M. H. HOSNI, H. W. COLEMAN, J. W. GARNER and R. P. TAYLOR	147	Roughness element shape effects on heat transfer and skin friction in rough-wall turbulent boundary layers
K. KAPOOR and Y. JALURIA	155	Penetrative convection of a plane turbulent wall jet in a two-layer thermally stable environment: a problem in enclosure fires

T. AIHARA, J.-K. KIM, K. SUZUKI and K. KASAHARA — 169 — Boiling heat transfer of a micro-impinging jet of liquid nitrogen in a very slender cryoprobe

G. S. H. LOCK and D. LADOON — 177 — Natural convection in the cranked thermosyphon

G. S. H. LOCK and D. LADOON — 183 — The influence of tilt on natural convection in the elbow thermosyphon

M. M. RAHMAN and A. FAGHRI — 189 — Gas absorption and solid dissolution in a thin liquid film on a rotating disk

J. SCHMALHOFER and A. FAGHRI — 201 — A study of circumferentially-heated and block-heated heat pipes—I. Experimental analysis and generalized analytical prediction of capillary limits

J. SCHMALHOFER and A. FAGHRI — 213 — A study of circumferentially-heated and block-heated heat pipes—II. Three-dimensional numerical modeling as a conjugate problem

Technical Notes

A. K. STUBOS, C. SATIK and Y. C. YORTSOS — 227 — Critical heat flux hysteresis in vapor–liquid counterflow in porous media

A. DEMETRIADES — 231 — Frequency response of constant-current film anemometers

P. C. S. JUCÁ and A. T. PRATA — 233 — Two-dimensional fins attached to a thick wall—effect of non-uniform root temperature

S. ACHARYA and A. MEHROTRA — 236 — Natural convection heat transfer in smooth and ribbed vertical channels

H. J. H. BROUWERS — 241 — The combined effects of fog formation and Stefan flow on nickel and iron evaporation into helium

Letters to the Editors

J. A. C. HUMPHREY and W. M. TO — 245 — Discussion of "Comparison of turbulence models for the natural convection boundary layer along a heated vertical plate"

R. A. W. M. HENKES and C. J. HOOGENDOORN — 246 — Authors' Reply

January, Number 2

Y. JOSHI, L. O. HAUKENES and S. B. SATHE — 249 — Natural convection liquid immersion cooling of a heat source flush mounted on a conducting substrate in a square enclosure

M. LOUGE, J. M. YUSOF and J. T. JENKINS — 265 — Heat transfer in the pneumatic transport of massive particles

Y. BAYAZITOGLU and R. CERNY — 277 — Electromagnetic vaporization of molten-metal drops

G. S. H. Lock and M. Wu	287	Heat transfer characteristics of a bayonet tube using air under laminar conditions
K. H. Im and R. K. Ahluwalia	293	Radiation properties of coal combustion products
J.-P. Delplanque and W. A. Sirignano	303	Numerical study of the transient vaporization of an oxygen droplet at sub- and super-critical conditions
J. B. Greenberg and P. D. Ronney	315	Analysis of Lewis number effects in flame spread
C. H. Oh and S. B. Englert	325	Critical heat flux for low flow boiling in vertical uniformly heated thin rectangular channels
A. H. George	337	Instantaneous local heat transfer coefficients and related frequency spectra for a horizontal cylinder in a high temperature fluidized bed
T. F. Fuller and J. Newman	347	Convective diffusion near a consolute point
Y.-X. Tao, R. W. Besant and K. S. Rezkallah	353	A mathematical model for predicting the densification and growth of frost on a flat plate
S. S. Yoo, T. S. Hwang, C. S. Eum and S. C. Bae	365	Turbulent heat transfer of polyacrylamide solutions in the thermal entrance region of circular tube flows
S. Y. Yoo, R. J. Goldstein and M. K. Chung	371	Effects of angle of attack on mass transfer from a square cylinder and its base plate
J.-Y. Jang and J.-L. Chen	383	Thermal dispersion and inertia effects on vortex instability of a horizontal mixed convection flow in a saturated porous medium
V. K. Pustovalov	391	Thermal processes under the action of laser radiation pulse on absorbing granules in heterogeneous biotissues
D. Y. Tzou	401	Reflection and refraction of thermal waves from a surface or an interface between dissimilar materials
A. Liu, T. E. Voth and T. L. Bergman	411	Pure material melting and solidification with liquid phase buoyancy and surface tension forces
Y. Hwang, N. D. Kazarinoff and J. C. Mollendorf	423	Hydrodynamic stability of multiple steady-states of vertical buoyancy-induced flows in cold pure water
W.-S. Fu and W.-J. Shieh	437	Transient thermal convection in an enclosure induced simultaneously by gravity and vibration
A. Dasgupta, P. Guenard, J. S. Ultman, J. S. Kimbell and K. T. Morgan	453	A photographic method for the visualization of mass uptake patterns in aqueous systems
T. K. Aldoss, T. S. Chen and B. F. Armaly	463	Nonsimilarity solutions for mixed convection from horizontal surfaces in a porous medium—variable surface heat flux

T. K. Aldoss, T. S. Chen and B. F. Armaly — 471 — Nonsimilarity solutions for mixed convection from horizontal surfaces in a porous medium—variable wall temperature

T. S. Chen, W. P. Buchanan and B. F. Armaly — 479 — Natural convection on vertical and horizontal plates with vectored surface mass transfer

D. G. Neilson and F. P. Incropera — 489 — Effect of rotation on fluid motion and channel formation during unidirectional solidification of a binary alloy

T.-M. Liou, J.-J. Hwang and S.-H. Chen — 507 — Simulation and measurement of enhanced turbulent heat transfer in a channel with periodic ribs on one principal wall

S. W. Armfield and W. Debler — 519 — Purging of density stabilized basins

Technical Notes

G. Jeandel, P. Boulet and G. Morlot — 531 — Radiative transfer through a medium of silica fibres oriented in parallel planes

E. A. Foumeny, F. Benyahia, J. A. A. Castro, H. A. Moallemi and S. Roshani — 536 — Correlations of pressure drop in packed beds taking into account the effect of confining wall

February, Number 3

O. Martynenko, J. Vilemas, V. Makarevicius, A. Slanciauskas and A. Žiugžda — 541 — Professor Algirdas Žukauskas on his 70th birthday

G. C. Vradis, J. Dougher and S. Kumar — 543 — Entrance pipe flow and heat transfer for a Bingham plastic

T. Nishimura, H. Itoh and H. Miyashita — 553 — The influence of tube layout on flow and mass transfer characteristics in tube banks in the transitional flow regime

C. B. Panchal and D. M. France — 565 — Heat transfer and pressure drop in large pitch spirally indented tubes

T. Kondoh, Y. Nagano and T. Tsuji — 577 — Computational study of laminar heat transfer downstream of a backward-facing step

I. Pop, J. K. Lee and R. S. R. Gorla — 593 — Convective wall plume in power-law fluids

S. M. Tieng and A. C. Yan — 599 — Experimental investigation on convective heat transfer of heated spinning sphere

A. La Pica, G. Rodonò and R. Volpes — 611 — An experimental investigation on natural convection of air in a vertical channel

C. STARK and J. FRICKE	617	Improved heat-transfer models for fibrous insulations
G. VISSER and M. VALK	627	The porosity in a fluidized bed heat transfer model
J.-Y. SAN	633	Heat and mass transfer in a two-dimensional cross-flow regenerator with a solid conduction effect
Y. CANDAU and G. PIAR	645	An application of spectral decomposition to model validation in the thermal analysis of buildings
J. F. KLAUSNER, R. MEI, D. M. BERNHARD and L. Z. ZENG	651	Vapor bubble departure in forced convection boiling
A. HUANG and D. D. JOSEPH	663	Stability of liquid–vapor flow down an inclined channel with phase change
Y. RABIN and E. KORIN	673	An efficient numerical solution for the multidimensional solidification (or melting) problem using a micro-computer
B. WEIGAND and H. BEER	685	Ice-formation phenomena for water flow inside a cooled parallel plate channel: an experimental and theoretical investigation of wavy ice layers
T. VESALA	695	On droplet evaporation in the presence of a condensing substance: the effect of internal diffusion
S. V. MANI, M. KULMALA and T. VESALA	705	Evaporation of polydisperse ethanol aerosols in humid environment
S. SUNDARRAJ and V. R. VOLLER	713	The binary alloy problem in an expanding domain: the microsegregation problem
C. J. HO and C. H. CHU	725	Periodic melting within a square enclosure with an oscillatory surface temperature
M. S. PHANIKUMAR and A. N. BHASKARWAR	735	On the enhancement in heat transfer through the use of slurries
G. BASTIAN et N. AL SHEIKH HASSAN	743	Détermination instantanée de l'effusivité massique d'humidité d'un matériau hygroscopique
M. RUHUL AMIN	755	Natural convection heat transfer in enclosures fitted with a periodic array of hot roughness elements at the bottom
TH. BES and W. ROETZEL	765	Thermal theory of the spiral heat exchanger
J. OGATA and A. YABE	775	Basic study on the enhancement of nucleate boiling heat transfer by applying electric fields
J. OGATA and A. YABE	783	Augmentation of boiling heat transfer by utilizing the EHD effect—EHD behaviour of boiling bubbles and heat transfer characteristics

F. CHEN and C. F. CHEN 793 Double-diffusive fingering convection in a porous medium

K. V. NARASIMHA RAO, G. S. V. L. NARASIMHAM and M. V. KRISHNA MURTHY 809 Analysis of heat and mass transfer during bulk hydraircooling of spherical food products

Technical Note

C. DESLOUIS, F. HUET, S. ROBIN and B. TRIBOLLET 823 Spectral analysis of wall turbulence with photolithography devised electrochemical probes

Letters to the Editors

D. A. BARRY 831 Comment on "Equivalent conductivity of a heterogeneous medium"

A. BEJAN 832 Comments on "Analysis of close-contact melting for octadecane and ice inside isothermally heated horizontal rectangular capsule"

March, Number 4

O. G. MARTYNENKO 833 Heat and mass transfer bibliography—CIS works

C. Y. SOONG and G. J. HWANG 845 Effects of stress work on similarity solutions of mixed convection in rotating channels with wall-transpiration

Y. B. WANG, C. CHAUSSAVOINE and F. TEYSSANDIER 857 Two-dimensional modelling of a non-confined circular impinging jet reactor—fluid dynamics and heat transfer

C. H. CHIANG and W. A. SIRIGNANO 875 Interacting, convecting, vaporizing fuel droplets with variable properties

Z.-G. YUAN and K. S. UDELL 887 Steam distillation of a single component hydrocarbon liquid in porous media

F. C. LAI 899 Improving effectiveness of pipe insulation by using radial baffles to suppress natural convection

N. BAGHERI and B. R. WHITE 907 Experimental measurements of large-scale temperature fluctuation structures in a heated incompressible turbulent boundary layer

C. P. GRIGOROPOULOS, H. K. PARK and X. XU 919 Modeling of pulsed laser irradiation of thin silicon layers

I. SHAI, U. LAOR and I. GILAD 925 Superposition of thermal loads model for measuring thermal diffusivity in solids
